INSTRUCTIONS.

1. The Priced Vocabulary of Clothing and Necessaries shows the nomenclature and detail of the articles as they are stored in and issued from clothing depots.

2. The articles have been classified, as far as possible, by services, and the arrangement should be followed in storehouses at clothing depots, as far as may be practicable, and subject to the condition that arrangements should be such as to afford the greatest facility in the transactions of receipt and issue.

3. The designations of the various articles, shown in heavy type, *e.g.*, **CAPS, SERVICE DRESS, O.R., Stiff,** have been made as short and distinctive as possible and, without the additional detail included in ordinary type, will be sufficient for use in ledger headings, vouchers, and returns. They will also generally be sufficient for use in indents, but if in any particular instance this is not so, additional information should be added to identify the service for which the article is required.

4. The items in Sections 1 and 2, the designations of which have been altered, are shown under their revised nomenclature. The old and new designations are shown together in the List of Amendments promulgated by A.O. 99 of 1925.

5. The designations of articles which are not of current manufacture, the existing stock of which will not be replaced, are shown in *italics*, instead of the heavy type referred to in para. 3.

6. Each article has, in addition, been assigned a "catalogue number." In ordinary printed or written indents, a quotation of this number will not be required. In cases, however, in which articles have to be urgently indented for, by wire or cable, a quotation of the "catalogue number," the generic heading of the item, and the quantity required, given in the order stated, will suffice, *e.g.*, 1241 Caps 50, or 2874 Jackets 100, or 2883 Trousers 100, &c. By this means urgent indenting by wire or cable should be much facilitated.

7. To facilitate references to rates, an index has been provided at the end of the book.

8. The rates quoted in this edition of the "Priced Vocabulary of Clothing and Necessaries," which include a percentage for inspection and departmental expenses, will govern the charges for all issues on payment, unless otherwise directed, and will be the basis for charges for articles lost, damaged, or destroyed by neglect.

At stations abroad a further percentage will be added as laid down in para. 12.

9. Charges for articles issued from Store are governed by para. 153, Clothing Regulations, Part I, 1922, except in the case of issues to the Territorial Army, which are to be priced as directed in para. 523, T.A. Regulations, 1924, as amended by A.O. 70 of 1926.

10. The rates quoted herein, as well as subsequent amendments thereto, will take effect at home stations and abroad, as and when directed by the Army Orders promulgating them.

11. The departmental charges included in the rates are to be taken as covering all expenses incidental to receipt, inspection and storage, ordinary packing (including baling canvas), and issue; also clerical labour at the store depots and headquarters, and carriage to the consignee (except as provided for in para. 12), but not the cost of packing cases or special packing.

12. For issues on payment and for recoveries on account of articles lost, and for assessing value of losses, an extra percentage to cover cost of freight and transport will be added at stations abroad. This extra percentage will not be charged to soldiers or civilian employees under the clothing allowance system on repayment issues of personal clothing and necessaries included in their authorized scales, nor will it be chargeable on materials used in repairing articles of personal clothing and boots; it will, however, be chargeable on materials used for the repair of officers' clothing, &c. The appropriate percentage will be communicated from time to time direct to the stations concerned.

13. The names, arrangement, and descriptions given will be adhered to in all Army vouchers of account, including those for stores returned to Army Ordnance Stations from units; also in Army Ordnance ledger headings, reports of issues, and indents, &c.

14. Vouchers for articles returned to Army Ordnance Stations should be made out in triplicate by carbon process on A.F. G 1033. When stores in more than one Pimlico section have to be returned, each section will commence on a separate sheet. Each complete voucher need only be headed on the first page and signed on the last page, but the portion relating to each separate section will bear the office stamp of the unit.

15. The form to be used in indenting for clothing and necessaries is A.F. G 997.

16. In demanding articles on manuscript indent forms a separate sheet should be used for each Pimlico section concerned.

17. Wherever articles appear in sections under which they should not be accounted for, reference is made to the section or to the page of the section wherein they should be shown in store ledgers.

18. Rates for items not included in this edition of the vocabulary should not be taken from previous editions, but, if required, should be specially applied for. Rates specially quoted should be regarded as inoperative at the end of the financial year in which they are given.

N.B.—The fact that articles appear in this Vocabulary, or in any particular section of it, does not justify indents for such articles if they are not sanctioned by regulation.

PRICED VOCABULARY OF CLOTHING AND NECESSARIES.
